Course Associates : Mr. Lakhan Lal Meena
: Dr. G. S. Karol

About the Institute

The National Institute of Health and Family Welfare is a premier autonomous Institute, funded by the Ministry of Health and Family Welfare, Government of India. It has kept pace with the new thinking and substantially contributed to the health manpower development in the country.

NIHFW serves as an apex 'technical institute' as well as a 'think tank' to promote national health and family welfare programmes in the country through education and training, research and evaluation, consultancy and advisory services, specialized projects, etc.

Location of the Institute

It is situated in South Delhi, near Jawaharlal Nehru University and Munirka DDA Flats. It is easily accessible from the Indira Gandhi International Airport and the New Delhi Railway Station, approximately 10 kms. and 15 kms. respectively. Pre-paid taxis/auto-rikshaws are available.

Course Fee

There is a course fee of Rs. 5000/- per participants. Cash/DD in favour of Director, NIHFW, New Delhi will be accepted. Expenditure on TA/DA will have to be borne by the respective States/organizations.

Accommodation

Moderate hostel accommodation at nominal rates would be provided to the participants only, within the Institute's Campus.

Weather

Weather in December will be cold and the temperature will be min. 8^o C and max. 21^o C. Woolen clothes will be required.

Last Date for Receiving Nominations

02 December, 2019

(Participants are requested to make travel plans only after receipt of confirmation for participation from NIHFW).

TRAINING COURSE ON LOGISTICS AND SUPPLY MANAGEMENT SYSTEM IN HEALTH AND FAMILY WELFARE

December 16 - 20, 2019

आरोग्यम् सुखसम्पदा

Department of MCHA

The National Institute of Health and Family Welfare
Munirka, New Delhi 110 067

Introduction

The original meaning of the Word 'Logistics' had distinct military connotation, defined by Webster as "the branch of military science concerned with the procurement, transportation, maintenance and supply of troops, equipment and facilities' used for bellicose purposes." Similarly, a Health and Family Welfare Programme has its logistic system, which provides essential medicines and contraceptive supplies even to remote peripheral service points on a regular basis. If this logistics supply malfunctions, the whole programme suffers; if it is interrupted, the whole programme collapses. Thus, the Health and Family Welfare Programme managers have been quick to identify logistics as a crucial component of Health Care Delivery System.

As the demand for Health and Family Welfare services has expanded and has become more sophisticated in terms of their quality, it's logistics system has to respond accordingly. Initially, viewed as simply medicines and contraceptives distribution and resupply networks, the logistics systems must now procure, stock and resupply medical equipment, materials and supplies. It is against this background this training course has been formulated so that the personnel dealing with this aspect of Health Care Delivery System at various levels could understand its problematic areas and probable solutions by observing the principles of materials management and procedures evolved in other organizations.

General Objective

This course is aimed at enhancement of

competence of participants in the areas of logistics, supplies and materials management so as to improve internal mechanism for effective distribution of medicines, contraceptives, equipments and related supplies to the various levels of Health Care Delivery System.

Specific Objectives

At the end of the course, the participants would be able to:

1. Describe the basic principles of logistics and supply management vis a vis in relation to Health Care Delivery System.
2. Discuss the National Drug Policy and Drugs and Cosmetic Act in India.
3. Enumerate the various steps of Materials Management Cycle.
4. Discuss the different components of Materials and Equipment management in detail in relation to Health Care Delivery System.
5. Demonstrate the scientific techniques required to improve logistics system.

Course Contents

The course intends to cover topics such as:-

- Principles of Logistics and Supply Management.
- Materials Management Cycle.
- Inventory Control Techniques.
