

About the Institute

The NIHFW, an autonomous organization, under the Ministry of Health and Family Welfare, Government of India, acts as an 'apex technical institute' as well as a 'think tank' for the promotion of health and family welfare programs in the country. The post-graduate education, training, research, evaluation, consultancy and advisory services in the field of health and family welfare have been a major focus of the institute. In order to facilitate continuous up-gradation of knowledge and skills of various health personnel across the country, the NIHFW has been conducting training courses in different areas at regular interval. In this endeavor, the Department of Management Sciences, NIHFW proposes to conduct an online training program on 'Health care Communication' from January 11th –15th, 2021.

ONLINE TRAINING COURSE ON HEALTH CARE COMMUNICATION

January 11-15, 2021

Department of Management Sciences
The National Institute of Health & Family Welfare
Baba Gang Nath Marg ,Munirka
New Delhi- 110 067

Introduction

Communication is an essential part of human life. Through communication people transfer facts, ideas, emotions, knowledge, attitudes and skills to make informed decisions about their health. Various communication methods are used by the healthcare system around the world to improve the quality of health care services. Health care communication in this direction an important approach which can contribute to achieve better health outcomes for individuals and for the whole community. By saying Health care communication, we mean the study and practice of communicating promotional health information, such as in public health campaigns, health education, and between doctor and patient. The purpose of disseminating health information is to influence personal health choices by improving health literacy. Health care communication functions as a means of facilitating the interaction between healthcare professionals and patients or in between the two or more healthcare professionals irrespective of working together in same or different organizations situated at distance places. As we know that there is a need to use advanced technologies for diagnostic and surgical purposes to meet out the expectations of the patients. Similarly, we cannot ignore the significant role of health care communication, in health delivery system because it strengthens good health practices and reduce the chances of health risk among public
