

TO REVIEW AND FINALIZE THE MODULES FOR THE PEER EDUCATORS FOR ADOLESCENT SEXUAL AND REPRODUCTIVE HEALTH

Investigators: Prof. Deoki Nandan

Dr. Poonam Khattar

Duration of initiation July 2011

Date of Completion October 2011

Justification and Background

The GOI commissioned SWACH to develop training package for peer educators for adolescent health. A draft package was prepared by SWACH based on the experiences of Haryana Modal. The role of NIHFW was to review and finalize the module.

Specific Objectives

- To review the Module developed for training of Peer Educators by the expert group.
- To finalize the Module based on the feedback received from the expert group.

Methods and Approaches used

- Work shop to Review the Module
- Workshop to finalize the Module

Description of Activities undertaken

1. Work shop to Review the Module

The first workshop to review the Module was organized on 29th Nov, 2011 at NIHFW. The experts were decided in mutual consultation with MoHFW, WHO and NIHFW. The draft developed by SWACH was distributed by email to experts. During the workshop, the experts reviewed the module by working in small groups and reviewed the contents and methodology for training of Peer educators. Each group presented their comments and the observations on the module to the entire group. The suggestions were incorporated by SWACH. This document was e-mailed and presented to the experts again in the second workshop for finalization.

2. Workshop to finalize the Module

The finalization meeting after incorporating suggestions in the Module of Peer Educators, by SWACH was held on 22nd December, 2011 at NIHFW. The experts involved in the previous workshop finalized the module. The comments were reviewed by the core group and suggestions were incorporated. The members were of the view that one more thorough review of contents was needed, hence a core group was constituted to review and give observations. In this regard, the final draft sent by SWACH was emailed to core group for their observations by circulation through e-mail. These suggestions were incorporated by SWACH. At the request of WHO and MOHFW, the NIHFW convened a small core group

meeting and looked into the suggestions received from experts. This draft has been submitted to WHO, MOHFW and SWACH.

Summary of Results

The module has been finalized and submitted to WHO, MOHFW for further deliberations by SWACH.

The Report and SOE have also been submitted to WHO.

Policy Implications

The module is under consideration for use by MOHFW.
